

Standardize and digitize your workflows to create project excellence.

For owners and EPC project directors, engineering leaders, and digital leads

Engineering | Project Management | Construction

Mining | Energy | Utilities

Lean Project Challenges

- Fragmented workflows between project management and disciplines

- Slow or no innovation
- Disconnected progress reporting
- Legacy drawings, spreadsheets and calculations
- Rework and construction surprises from inconsistent documentation and data
- Change fatigue and AI fear

Your opportunity

- ✓ Better visibility
- ✓ Less rework
- ✓ Stronger project economics
- ✓ New commercial models
- ✓ AI preparedness

Digitalization program

Focus areas

- Workflow focus
- Vendor neutral
- Value driven

Project Management

Construction

Engineering

How we work

Fast track:

- 4–6 week workflow diagnostic
- Prioritized roadmap & quantified business case
- 8-week pilot on a flagship project to prove value

Case Studies

- ❖ 50% Faster, 50% Cheaper: Automated Parametric Deliverables on Capital Projects
- ❖ 30% Fewer Surprises: Integrated Project Reporting That Restored Owner Trust
- ❖ 30% Faster Handover: Digital Foundations That Cut Errors and Unlock Information Access
- ❖ AI Design Review & Checking 75% Faster
